

AQANA – VACANCY: PROCESS ENGINEER/ TECHNOLOGIST (FULL TIME)

To support our growing business, we are currently seeking an experienced Process Engineer/ Technologist.

In this exciting opportunity to join our team in Leeuwarden you will be closely involved in the application of AQANA's patented technologies. Your input will be required at various levels from the (pre-)sales stage to the commissioning and start-up of new installations. Together with our sales team you will make sure that every design parameter is carefully checked before submitting the final proposal to our clients.

Your skills and technical expertise will contribute directly to our success and play a key role in selecting the appropriate technical solution for each project you are involved in. In some cases you may go to site to discuss the treatment possibilities with the clients' technical staff before selecting the most appropriate solution. For each of your projects you will make sure that the operation and maintenance manual is adapted for every unique situation. This will be your point of reference when training the client's staff during start-up, and when supporting AQANA's service department in the after sales trajectory.

As an AQANA Process Engineer you will have the opportunity to travel worldwide and connect with various cultures. Depending on the location of the project, you will be staying abroad for longer periods taking care of commissioning and start-up of our plants. We offer a unique opportunity to build a career in an exciting international environment.

Basic Qualifications

- Bachelor or Masters' Degree in Environmental, Process Technology, and/or Chemical Engineering, with at least 3 years practical experience (also with biological processes);
- You love to look for the best solution together with the client and your colleagues; Ability to work independently, as well as part of a team
- Strong communication skills, both verbal and written;
- Professional knowledge of the English language. Knowledge of Dutch, French, Spanish, Portuguese and/or German is a pre;
- Driver's license (B)
- Willing to travel abroad on a regular basis, occasionally for prolonged periods of time

About AQANA B.V.

AQANA B.V. is a global innovation leader in anaerobic, carrier-based, wastewater treatment solutions for the industrial market (Food & Beverage, Brewery, Pulp & Paper, Chemical, etc.).

We provide cutting-edge solutions and services, to meet the demanding needs of industrial clients to continuously comply with ever more strict environmental rules. Solutions are tailor-made/ designed for each specific clients' needs. The carrier-based anaerobic technology provides a more robust, easier to operate alternative when compared to conventional granular sludge-based technologies. The patented DACS®-reactors

ensure continuity in the treatment process whilst at the same time working within a significantly larger operational window, covering a wider range of industrial effluents.

Our head office is in European Water Hub Leeuwarden, in the north of the Netherlands. To learn more about AQANA, please visit www.aqana.com.

What we offer

- ✓ A competitive salary based on experience
- ✓ 27 company holidays and 9 national holidays
- ✓ Financial compensation for working prolonged periods outside the EU
- ✓ Pension Scheme with Centraal Beheer PPI (previously ABN-AMRO Pension Fund)
- ✓ Commuting allowance
- ✓ AQANA working clothes and safety equipment, company laptop and mobile phone
- ✓ Weekly Friday morning coffee break in which we connect with colleagues worldwide, sharing any news of the past week
- ✓ Possibility to increase your knowledge by Aqana sponsored technical and language courses
